

Please reject the NAB petition 04-160. I have been a XM Satellite Radio subscriber for 17 months and appreciate the convenience of the weather and traffic information. I travel from Florida to New York and back several times a year, and drive frequently on the Interstate 4 corridor in Florida. There is no commercial station that provides the up-to-the-minute information that facilitates my travel and travel planning. And I prefer to not channel-search to find traffic and weather on commercial stations as I travel. The XM service is fulfilling a need that I have - do not take it away. Thank you.
